

## COVID-19 CPT vaccine and immunization codes

---

Beginning Aug. 14, 2023, new Current Procedural Terminology (CPT®) codes have been created that consolidate over 50 previous codes and greatly streamline the reporting of immunizations for the novel coronavirus (SARS-CoV-2, also known as COVID-19).

### Unique CPT codes approved for COVID-19 immunizations

Beginning on Aug. 14, 2023, the CPT Editorial Panel approved the addition of new product codes 91318-91322 (91318 , 91319 , 91320 , 91321 , 91322) to identify monovalent vaccine product for immunization against COVID-19 (Pfizer, Moderna); retained existing Novavax Product Code 91304 for currently authorized vaccine product available for use in the U.S. and the updated (XBB.1.5) vaccine; deletion and/or revision of all other existing COVID codes (product and administration with associated guidelines and parenthetical note deletions/revisions); and addition of a single administration code (90480) for administration of new (i.e., 91318-91322) and existing (i.e., 91304) COVID-19 vaccine product.

All existing CPT codes that describe COVID-19 vaccine products and associated administration codes that end in "A" for products that are no longer covered under an existing Emergency Use Authorization (EUA) or Biologics License Application (BLA) from the US Food and Drug Administration (FDA) will be deleted effective Nov. 1, 2023.

### Category I vaccine descriptors

To view the updated SARS-CoV-2-related CPT codes approved by the CPT Editorial Panel, please visit the Category I immunizations page.

### Find your COVID-19 Vaccine CPT® Codes tool

Effective Nov. 3, 2023, the “Find your COVID-19 vaccine CPT codes” tool will no longer be available because the CPT code structure has been simplified.

## Vaccine resources

- Orthopoxvirus and monkeypox coding & guidance
- COVID-19 CPT vaccine and immunization codes
- COVID-19 CPT coding and guidance

## CPT<sup>®</sup> Assistant provides guidance for new codes

*CPT Assistant* provides fact sheets for coding guidance for new SARS-CoV-2 (COVID-19)-related vaccine codes.

The fact sheets include:

- Codes, descriptors and purpose
- Clinical examples
- Description of the procedures
- FAQs
