

Pearl of the Week: Reduce the documentation burden

AMA  | STEPS*forward*[®]

Pearl of the week

The rules for E/M office visit coding documentation changed recently—a physician deciding on the right level of service for a patient no longer has to include the documented history and physical exam. Under the new rules, physicians can bill office or outpatient E/M encounters based solely on medical decision-making (MDM) or on the total time spent on the date of that encounter.
